

Vector: **pAddRD** (for overexpression; RFP co-expression)

Antibiotic Selection: Kanamycin in DB3.1 cells

Creator(s): Linghuan Zhang @ Molecular Oncology Lab of The University of Chicago

Date of Construction: July 4, 2018

IMPORTANT NOTE: The ISC fragment of the transgene/insert (isolated from pSEBI vector or similar vectors) needs to be screened from the correct cloning direction using **TO4 Fwd (TCH658)** or **BGHPa Rev (e.g., TCH1242, TCH5387, or TCH5944)**
